Subject: Microsoft Settlement

To whom it may concern:

The proposed settlement in the Microsoft antitrust case is DEFICIENT as written.

Any remedy MUST create conditions under which small companies and individuals can design and sell new software without fear that Microsoft can, at its arbitrary choosing, preempt and swamp their business with free software "integrated" into the Microsoft system.

If this condition is not met, soon the only innovation in technology will be the innovation that Microsoft permits to exist.

Thank you,
David Cortesi
